## Summary

Software Developer with 6+ years of experience designing, developing, and maintaining scalable, responsive, and production-grade web applications using Angular, Next.js, React.js, TypeScript, JavaScript, PHP, CodeIgniter, and Node.js. Strong experience building enterprise event platforms, airline booking systems, conference websites, and marketing platforms with a focus on frontend architecture, reusable component systems, responsive design, SEO optimization, and seamless user experience.

Experienced in leading complete end-to-end product development including frontend architecture, API integration, backend coordination, deployment workflows, production maintenance, and performance optimization. Successfully modernized legacy Angular platforms by migrating them to Next.js to improve scalability, maintainability, search visibility, rendering performance, and developer experience.

Skilled in building SSR/SSG applications, implementing dynamic routing systems, optimizing Lighthouse performance, handling production deployments, and developing scalable UI architectures for large-scale digital platforms. Worked independently on multiple production systems while collaborating closely with designers, QA teams, backend engineers, and stakeholders in Agile development environments.

## Core Skills

Frontend: Angular, Next.js, React.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, Bootstrap, Responsive Design, Reusable UI Components, Cross-browser Compatibility

Backend & APIs: PHP, CodeIgniter, Node.js, REST APIs, JSON APIs, Third-party Integrations, Authentication Flows, Dynamic Content Management

Performance & SEO: SSR, SSG, Lazy Loading, Code Splitting, Image Optimization, SEO Optimization, Lighthouse Optimization, Metadata Management

Tools & Platforms: Git, GitHub, Vercel, Firebase, Postman, Figma, Deployment Workflows, Production Support

Architecture & Development: Component-driven Development, Modular Frontend Architecture, Scalable UI Systems, Agile Development, UI Optimization

Development Practices: Agile Development, UI Optimization, Deployment Workflows, Production Support

## Highlights

- 6+ years of experience building production-grade web applications and enterprise platforms
- Migrated large-scale event platforms from Angular to Next.js for improved SEO and performance
- Worked on airline booking systems, developer conference platforms, and event management applications
- Built reusable frontend architectures and scalable UI component systems across multiple projects
- Experienced in frontend optimization, API integration, and production deployment workflows
- Collaborated with cross-functional teams including backend engineers, designers, and QA teams

## Experience

Advanced Millennium Technologies Pvt. Ltd

Software Developer, Bengaluru | Nov 2019 – Aug 2025

- Developed and maintained enterprise-grade web applications using Angular, Next.js, TypeScript, PHP, CodeIgniter, and Node.js for event management and airline booking platforms.
  - Led frontend modernization efforts by migrating production platforms from Angular to Next.js to improve scalability, SEO, performance, and maintainability.
  - Built responsive and SEO-friendly user interfaces optimized for desktop, tablet, and mobile experiences across multiple production applications.
  - Developed reusable frontend components and modular UI systems to improve consistency, scalability, and development efficiency across projects.
  - Integrated REST APIs, booking workflows, event management systems, and third-party services to support dynamic business requirements.
  - Worked on large-scale conference and event platforms supporting session schedules, speaker profiles, sponsor showcases, attendee registration, and live updates.
  - Improved application performance through lazy loading, optimized asset delivery, frontend rendering optimization, and structured component architecture.
  - Managed bug fixing, browser compatibility issues, deployment support, and post-release maintenance for client-facing applications.
  - Collaborated with backend engineers, designers, QA teams, and project stakeholders within Agile sprint cycles to deliver production-ready features.
- 
- Supported production deployments, release management, and ongoing platform maintenance for business-critical applications.
  - Worked extensively on dynamic metadata generation, SEO-friendly rendering strategies, and responsive layouts to improve discoverability and user engagement.
  - Built scalable reusable frontend systems and shared UI structures that improved consistency and maintainability across multiple enterprise projects.
  - Handled end-to-end development responsibilities including architecture planning, frontend implementation, deployment coordination, production debugging, and feature maintenance.
  - Contributed to frontend architecture decisions, reusable development standards, and UI consistency across enterprise applications.

## Leap Infotech Solutions

Web Developer, Kerala | Jan 2019 – Aug 2019

- Designed and developed responsive business websites and interactive frontend interfaces using HTML, CSS, JavaScript, Bootstrap, PHP, and CodeIgniter.
- Built modern UI layouts and optimized page structures to improve accessibility, responsiveness, and user experience.
- Collaborated with backend developers to integrate APIs and dynamic content into frontend applications.
- Supported deployment activities, bug fixing, and browser compatibility improvements across multiple client projects.

## FinedgeIT Solutions

Intern, Calicut | Jul 2018 – Jan 2019

- Assisted in frontend development and implementation of web application modules under senior developer guidance.
- Gained hands-on experience with debugging, Git workflows, responsive UI development, and collaborative development practices.
- Contributed to UI enhancements and feature implementations for internal web applications.

## Projects

### DeveloperSummit

- Managed production deployments, server configuration, bug fixing, performance optimization, and ongoing feature delivery independently.
- Implemented API integrations, dynamic routing, metadata management, reusable component systems, and responsive UI architecture across the platform.
- Designed and developed scalable frontend systems supporting speaker profiles, session schedules, sponsor showcases, attendee registrations, and dynamic event content management.
- Architected and migrated the platform from Angular to Next.js to improve SEO, scalability, maintainability, and frontend rendering performance.
- Led the complete end-to-end development of the DeveloperSummit platform as the sole engineer responsible for frontend architecture, backend integrations, deployment workflows, and production maintenance.

### Saltmarch

- Handled deployment workflows, production optimization, debugging, and feature enhancements independently across the platform lifecycle.
- Developed reusable UI systems, API-driven dynamic pages, and modular frontend architecture to improve maintainability and development efficiency.

- Built scalable and responsive interfaces for event promotions, speaker management, registrations, and on-demand media content delivery.
- Migrated the platform from Angular to Next.js to modernize the frontend stack and improve SEO, scalability, maintainability, and performance.
- Owned the complete end-to-end development of the Saltmarch platform as the sole developer handling architecture, frontend implementation, backend integrations, deployment, and production support.

## NDC Deals

- Optimized rendering performance and frontend responsiveness for production booking workflows across devices.
- Collaborated with backend systems to integrate airline APIs, booking engines, and dynamic pricing content.
- Developed responsive search, booking, and checkout interfaces supporting seamless customer booking experiences.
- Worked on frontend architecture and API integrations for airline fare distribution and ancillary booking workflows.
- Contributed to the development of a flight and ancillary booking platform delivering NDC airline fares and travel services from partner airlines.
- Implemented responsive booking workflows, airline search interfaces, and optimized frontend rendering for seamless customer experience.
- Integrated API-driven airline content and collaborated with backend teams to support dynamic booking interactions.
- Improved frontend responsiveness and UI consistency across desktop and mobile devices.
- Technologies: Angular, JavaScript, CSS, Bootstrap, REST APIs, GitHub

## Education

Bachelor of Computer Applications (BCA)

SAFI Institute of Advanced Study, Calicut, Kerala | 2015 – 2018

## Languages

English, Malayalam, Tamil, Hindi
