## PROFILE

---

Software Engineer with 6+ years of experience in building modern, responsive, and scalable web applications using **Next.js, Angular, TypeScript, and JavaScript**. Skilled in developing high-performance user interfaces and delivering production-ready solutions for event platforms and flight booking portals. Passionate about clean code, modern UI practices, and creating seamless digital experiences.

## EDUCATION

---

**Bachelor of Computer Applications (BCA)** 08/2015 – 01/2018  
*SAFI Institute of Advanced Study* Calicut, Kerala

## PROFESSIONAL EXPERIENCE

---

**Software Engineer** 11/2019 – 09/2025  
*Advanced Millennium Technologies Pvt. Ltd* Bengaluru, Karnataka

- Developed and maintained scalable, high-performance web applications using **Angular, TypeScript, and modern JavaScript frameworks**.
- Built responsive and user-friendly interfaces for enterprise platforms including **event management and airline booking portals**.
- Collaborated with cross-functional teams (design, backend, QA) to deliver production-ready features on time.
- Optimized application performance and improved UI consistency across devices and browsers.
- Integrated APIs and implemented reusable components to enhance development efficiency and maintainability.

**Web Developer** 01/2019 – 08/2019  
*Leap Infotech Solutions* Kinfra Kakkanchery, Kerala

- Designed and developed responsive websites and interactive UI components for client projects.
- Worked with frontend technologies including **HTML, CSS, JavaScript, and Bootstrap** to deliver clean and modern layouts.
- Supported backend integration and ensured smooth deployment of web solutions.
- Improved user experience through structured styling and optimized page performance.

**Intern** 07/2018 – 01/2019  
*Finedge IT Solutions* Calicut, Kerala

- Assisted in developing web application modules and frontend features under senior engineer guidance.
- Gained hands-on experience with real-world development workflows, debugging, and version control practices.
- Contributed to UI improvements and basic feature implementations for internal projects.

## PROJECTS

---

### Developersummit [↗](#)

- Developed an event-focused platform showcasing **sessions, schedules, and speaker profiles** for a large-scale developer summit.
- Built responsive UI components and ensured smooth navigation across devices.
- Collaborated with the team to deliver an engaging experience for attendees and organizers.
- **Technologies:** Angular · HTML · CSS · PHP · Bootstrap · GitHub

### NDC Deals [↗](#)

- Contributed to the development of a flight and ancillary booking portal that provides **NDC fares directly from partner airlines**.
- Implemented user-friendly booking flows and optimized interface performance.
- Integrated airline content and ensured seamless interaction with backend services.
- **Technologies:** Angular · JavaScript · CSS · Bootstrap · GitHub

### Saltmarch [↗](#)

- Built a digital platform for promoting upcoming events, managing speakers, and delivering **on-demand video content**.
- Developed reusable frontend modules to improve maintainability and scalability.
- Enhanced the user experience through responsive layouts and consistent UI design.
- **Technologies:** Angular · HTML · CSS · PHP · Bootstrap · GitHub
